

Dashboard Lite

Visualize your operations, track personnel, assets and much more...

TopVu™ dashboard allows you to visualize your operation, track personnel and assets, deliver reliable realtime and historical information to management, security and higher level analytical applications to improve safety, production, and emergency response time.

System Requirements

Operating System

Windows 7 Professional (64 Bit)

Processor

Core i7 @ 3GHz

Hard Drive

500GB

**Installation requires minimum 200MB*

Memory

Minimum: 2GB

Recommended: 4GB

Video

Minimum display of 1024x768

Tracking

Centralized view and database of asset location and movement in real time.

Safety

Quickly locate mine rescue personnel, monitor hours spent in difficult areas (hot, presence of gases or dust).

Optimization

Deliver reliable realtime and historical information to management which can help improve production and safety.

Mine Utility Control

Energy is a large cost and the control of these functions can have a significant impact on the operation's bottom line.
